APPLICATION:

Since its beginning in 1960, Unitron has specialized in the design and development of reliable, solid-state power systems. Through an innovative design, Built-In Test Equipment (BITE) and modular construction, Unitron products assure maximum power availability and minimal repair time for the latest military aircraft including the F-22A Raptor and the JSF F-35A, Lightning-II.

The UFC Series includes lightweight 400Hz or 270VDC and 28VDC mobile GPUs for aircraft ground power applications in the hangar or ramp area. The dual output AC/DC Low ProFile™ provides 90kVA of 400Hz power "AND" 72kW of 270VDC plus optional 28VDC up to 1200 amps continuous. Because a single unit can do the work of **THREE**, Unitron's AC/DC GPU reduces operating and maintenance costs, and decreases ramp congestion.
